 PFLEIDERER

*P* Pfleiderer  
**rimeBoard**

High-quality lacquered surfaces in matt and high-gloss finishes

# *I*NFORMATION & PROPERTIES

With PrimeBoard, Pfleiderer is setting new standards in extremely matt and high-gloss surface technology.

Thanks to its excellent properties, PrimeBoard is particularly easy to clean and permanently withstands high stresses. Integrated in our colour match range, the new lacquered surface allows for versatile and flexible use and perfect combinations while ensuring long-lasting colour stability. PrimeBoard also stands out due to its excellent machinability.

# TOP QUALITY

- › very good machinability
- › resistant
- › highly cost-effective
- › high colour stability
- › easy cleaning
- › optimum, waste-efficient dimensions
- › solvent-free
- › integrated in colour match range, thus allowing for perfect combinations
- › elegant surface finish

XTreme Matt

# *X*Treme Matt

With its extremely matt finish and velvety feel, Pfleiderer PrimeBoard appears absolutely puristic, while being, on the whole, a true eye-catcher.

For matt surfaces create an impression of particular depth and radiate a certain noble elegance. XTreme Matt gives plain decors and wood reproductions a truly pure and precious look.

Thanks to the Anti-Fingerprint effect, matt surfaces are protected against soiling and allow for easy cleaning.

# *Z* Treme High Gloss

With its lacquered high gloss finish, PrimeBoard from Pfleiderer provides a perfectly even and three-dimensional mirror shine that lends a modern touch to plain decors. Its impressive depth conveys an extraordinary elegance to classic wood, stone and mother-of-pearl decors.

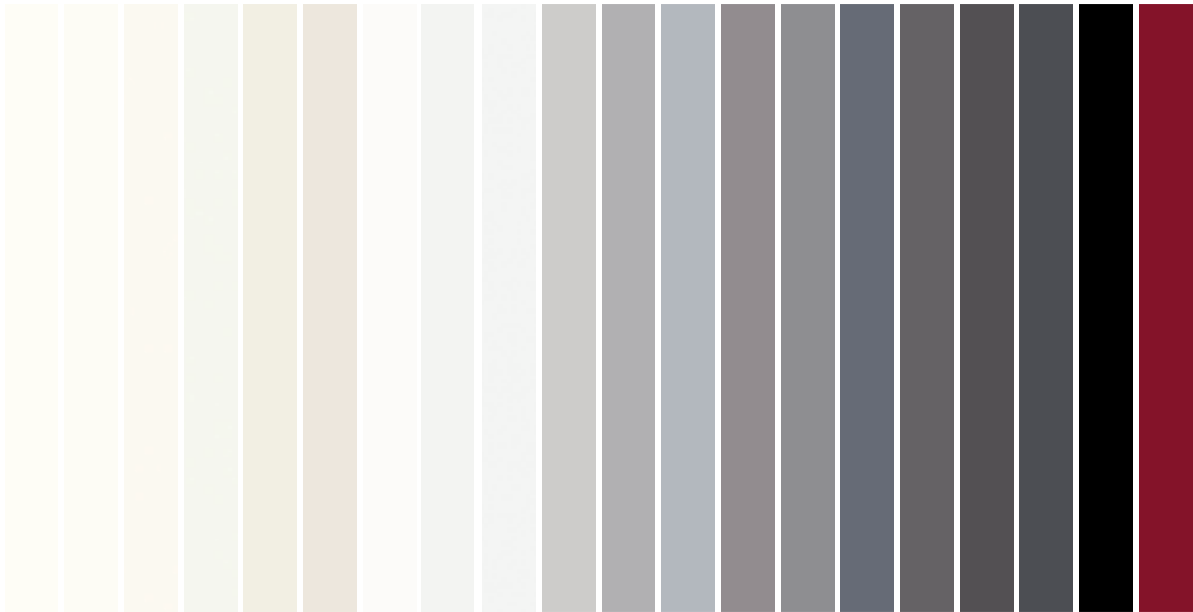

And thanks to its excellent abrasion and scratch resistance, the high-quality surface will keep its gloss for a long time.

# DECORS

Integrated into Pfleiderer's colour match system, the new lacquered surface allows for optimum, almost boundless freedom of design – that goes also for combinations with other Pfleiderer products.

By providing perfectly matching products for various requirements and areas of application, Pfleiderer can fully meet its customers' wishes.

Pfleiderer PrimeBoard goes particularly well with plain decors in white, black and grey tones, as these designs have an impressive depth and convey an elegant simplicity.

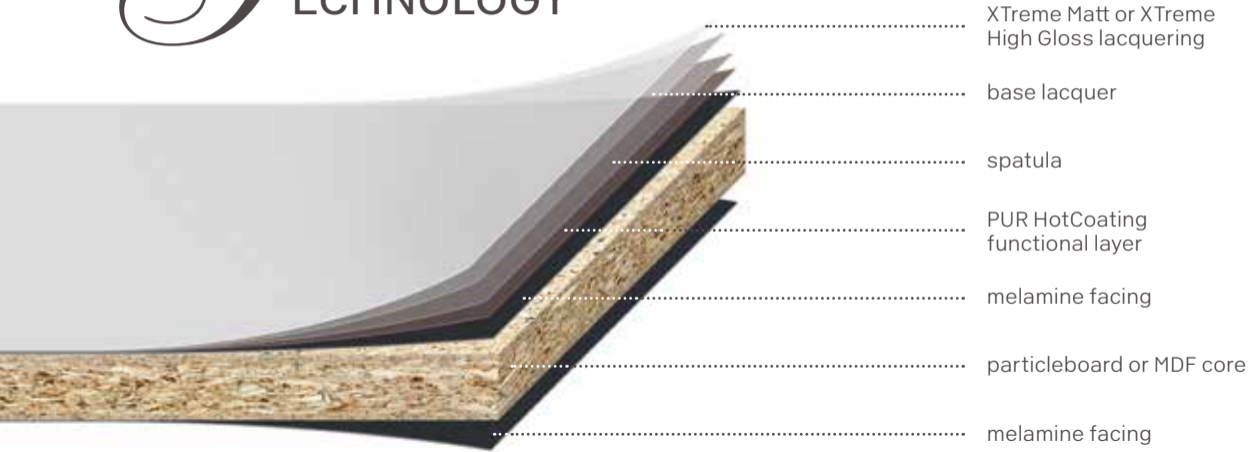

# T ECHNOLOGY

As a product of very high quality, Pfleiderer PrimeBoard distinguishes itself by its extraordinary properties making the new lacquered surface robust and durable.

Unique in Europe so far, the surface's manufacturing process is, in this form, being exclusively employed by Pfleiderer. The lacquering process comprises three steps and allows for one-sided or two-sided lacquer application.

The technology is based on solvent-free acrylic lacquers that consist of 100% solids.

# T ECHNOLOGY

# FORMATS

From 2018, Pfleiderer PrimeBoard will be available in the particularly waste-efficient format of

2,800 mm x 2,100 mm (l x w)

Pfleiderer PrimeBoard is currently available in the following size:

2,100 mm x 1,250 mm (l x w)

# R RESPONSIBILITY

Like all of its products, Pfleiderer manufactures PrimeBoard with utmost care. The manufacturing process is subject to a certified environmental management system.

PrimeBoard is also available FSC® (license code: FSC-C011773) or PEFC™ certified upon request.

The new surface is manufactured using 100% solvent-free acrylic lacquers and is, therefore, also good for the environment.

# FINISH

Setting highlights in your interior with Pfleiderer PrimeBoard.

Interior design to suit one's individual taste becomes feasible using Pfleiderer PrimeBoard in XTreme Matt and XTreme High Gloss.

The product distinguishes itself by its excellent properties:

Pfleiderer PrimeBoard is durable, easy to clean and has an especially high colour stability. Thanks to its integration in our wide range of matching decors and colours, Pfleiderer PrimeBoard allows for flexible and versatile use.
